地图一

```
<body onload="init()">
<div class="map">
    <div id="container" style="height:
6rem;background: #dcdcdc;"></div>
    <script charset="utf-8"
src="http://map.qq.com/api/js?v=2.exp"></script>
    <script>
        var init = function() {
            var center = new
qq.maps.LatLng(24.877170, 104.299100);
            var map = new
qq.maps.Map(document.getElementById('container'), {
                center: center,
                zoom: 16,
                zoomControl: false,
                panControl: false,
                //设置地图类型
                mapTypeControlOptions: {
                    //设置控件的地图类型ID, ROADMAP显示
                    普通街道地图, SATELLITE显示卫星图像, HYBRID显示卫星图像
                    上的主要街道透明层
                }
                mapTypeIds: [
                    /*qq.maps.MapTypeId.ROADMAP,
```

```

        qq.maps.MapTypeId.SATELLITE,
        qq.maps.MapTypeId.HYBRID*/
    ],
    //设置控件位置相对上方中间位置对齐
    position:
qq.maps.ControlPosition.TOP_CENTER
    },
    });
    //创建标记
    var marker = new qq.maps.Marker({
        position: center,
        map: map,
        //设置位置图片
        icon: new qq.maps.MarkerImage(
            "images/other_img16.png")
    });
}
</script>
</div>

```
