vue下添加title标题：

在build下面的webpack.dev.conf.js里添加高亮内容

```
plugins: [
    new webpack.DefinePlugin({
        'process.env': require('../config/dev.env')
    }),
    new webpack.HotModuleReplacementPlugin(),
    new webpack.NamedModulesPlugin(), // HMR shows correct file names in console
on update.
    new webpack.NoEmitOnErrorsPlugin(),
    // https://github.com/ampedandwired/html-webpack-plugin
    new HtmlWebpackPlugin({
        filename: 'index.html',
        template: 'index.html',
        inject: true,
        favicon: './favicon.ico'//自己手动添加的，为了显示title
图标
    }),
    // copy custom static assets
    new CopyWebpackPlugin([
        {
            from: path.resolve(__dirname, '../static'),
            to: config.dev.assetsSubDirectory,
            ignore: ['.*']
        }
    ])
]
```

图片存放位置和html同级

html页面添加title标题：

```
<link rel="icon" href="../favicon.ico" type="image/x-icon">
```
